[ANN] [Pre - ICO] REcoin - the first cryptocurrency backed by real estate (self.icocrypto)

6 submitted 3 days ago * by 101REcoin

*This text is the short info about REcoin*Official site: [101REcoin](#)Official FB page: [101REcoin](#)

REcoin provides both investors and the average person a safer, more secure and superior alternative to storing their wealth in the form of digital currency.

REcoin is a new cryptocurrency alternative designed to accommodate a wide range of financial transactions and investment goals. Its security is ensured through the use of one of the soundest and most reliable currency backings there is: real estate. Many of those who are looking to invest their earnings face the dilemma of putting their savings into low interest rate bank accounts or lacking other investment alternatives due to a lack of liquidity. The world's widely used fiat currencies are backed by no real commodities. REcoin is backed by real estate in countries with a developed and stable economy such as the United States, Canada, the U.K. and Switzerland.

How Does REcoin Work?

ReCoin users purchase the REcoin currency as an alternative to storing their savings bank accounts or other options, converting their money into a more stable and secure investment. The value of the currency can grow at least two ways: through the steady increasing value of the real estate investments that ReCoin is used to purchase, and a higher ReCoin value when the demand for REcoin rises. The management of the REcoin supply and its security is guaranteed through the latest blockchain cryptocurrency technology. REcoin offers its users an easy and intuitive buying and selling process, and furthermore it is designed to be easily used as a currency alternative for a full range real estate transactions and services.

The Unique Advantages of REcoin.

ReCoin offers numerous distinct advantages compared to other currencies and real estate purchasing methods.

- ReCoin simplifies and speeds up real estate transactions and allows independence from several traditional third-parties involved in real estate transactions.
- ReCoin lowers the cost of real estate transactions by limiting third-parties and increasing their speed, allowing for greater profitability for brokers, agents, and lower prices for buyers.
- ReCoin offers a new international real estate marketplace and facilitates connections for investors, brokers, and real estate sellers.

REcoin's Guarantees.

ReCoin offers several guarantees to its users to protect their investment:

- ReCoin's activities are in full compliance and governed by United States law.
- 100% of our proceeds from ReCoin sales minus maintenance costs are invested into real estate.
- In worst-case scenarios, The ReCoin Trust guarantees a liquidity ratio of up to 70% of the currency's market value. Compare this to the Federal Reserve requirement for liquidity ratios for financial institutions, which is set at a maximum of 10%.
- The ReCoin Purse is secured by the latest cryptocurrency tools and designed to be user-friendly and convenient.

Smart Contracts.

As one of its most important features, ReCoin implements Smart Contracts which are implemented from Ethereum, the most widely used secure smart-contract platform. Smart contracts are algorithms that facilitate, automate, verify or enforce financial contracts. They are designed to reduce the traditional costs and time associated with developing and enforcing contracts through the use of automatically enforced contractual conditions. In the world of real estate, smart contracts can be used to ensure that payment terms, service fees or liens are paid for once the contract is executed. Smart contracts allow for cryptocurrencies like ReCoin to be safely used as working capital for real estate transactions.

Why Should You Use ReCoin?

- Preserve your wealth by converting it from unstable and uncertain currency into a cryptocurrency solely used for stable and secure real estate investments.
- A safer, easier and faster way for real estate buyers and sellers throughout the world to find investments, close real estate deals and securely pay for their transactions.
- Use ReCoin for less expensive and more efficient real estate transactions and services with limited third-party involvement and a lower overall cost.
- Use ReCoin to invest in the most widely known and trusted global charities.

I wonder what kind of real estate transactions and services you can do using REcoin?

the same question, but if it truth it's awesome!!!

"The proceeds from the initial sale of tokens will be invested in the highly regulated real estate market in virtually all jurisdictions while reinforcing the holders' and investors' confidence in the REcoin". I think buying and selling a house or apartment, although renting would also be good.

But what about security?

[permalink](#) [embed](#)

[–] [serhishulak](#) 1 point 29 minutes ago

I think it will be identical to that we have of the Ethereum. Not ideal like BTC, but good too.

What is the usefulness of a ReCoin if the amount of investment in it does not allow buying real estate in the States or Canada. Is it worth it to invest?

[permalink](#) [embed](#)

[–] [2222_18](#) 1 point 11 hours ago

I hope the currency will be stable

It explains wery clearly the reason why ReCoin is better, safetier and less expansive, more comfortable and well-organised

I still think of investing REcoin into the charity OXFAM. I discussed it with my colleagues. They are passionate about such idea.

You know what impresses most? That actually "smart contracts" were created in 1994!It's increadble that we can use this system nowadays) If I'm not mistaking such idea uses just ETH. I mean for this coin smart contracts are such benefit!

As far as I am concerned "Use ReCoin to invest in the most widely known and trusted global charities." those "pros" are in the most of cryptocurrencies... You bet! Another benefits are great proposal. But charity is not a unique feature

I think that the unique feature is not the idea of charity. Now any person who lives in a poor country and has saved up some money can safely invest in reliable assets. Previously, it was only available to rich people, and ReCoin gives this opportunity to everyone.

[permalink](#) [embed](#) [parent](#)

[\[-\] KirillManhattan](#) 1 point 21 hours ago

Charity as the law of a boomerang, you give back. In this case, you work first to a name and later the name works for you, do you think I'm right?

But charity can help and then people will trust more:)

I believe they have recently purchased 19 office blocks in various USA cities in order to back up the REcoin. This will make sure that REcoin will stay stable in the long run.

What the main idea of this do you think?

[permalink](#) [embed](#) [parent](#)

ReCoin helps to make the investment more reliable, especially its stability and a small percentage - is the main reason why people don't have to open a bank account.

You know, I'm one of representatives of OXFAM. We help people in poorer countries. And it's really great to know that we can use ReCoin in our charity activities. I'll discuss it with my colleagues. Thanks!

I wonder how the fluctuations in property prices will affect the value of ReCoin. But in any case, real estate is a good guarantee for investors.

If a man will begin with certainties, he shall end in doubts; but if he will be content to begin with doubt, he shall end in certainties.

This is a complex thought. Do you think that too attractive guarantees will scare off people who are interested in ReCoin?

Actually, the concept of having a digital currency backed up by real estate is the most realistic one out of all I have seen so far, as it has some real assets that are impossible to dump.

Another new cryptocurrency. As always, there are many good promises. But will they be so useful... I can not argue with the fact that this cryptocurrency seems quite reliable and safe. Because it uses real estate as a currency backings, and the remaining currencies are backed by no real goods.

[permalink](#) [embed](#)

[\[-\] caseyanthony195](#) 2 points 2 days ago

This seems like a really elegant way of handling transactions in real estate market. The fact that this digital currency is backed up by real assets also makes it trustworthy imo.

Extraordinary decision, nice to know its activities are fully governed by the law of the United States of America.

I think it's very good. Crypto-currency, protected by real estate, will be well received by people. Conservative people will be much easier to accept the idea of crypto currency.
